

Technologiegründerfonds Sachsen

www.tgfs.de

The early stage Venture Capital Fund „Technologiegründerfonds Sachsen“ (TGFS) targets technology startups with high growth potential and the opportunity to become a market leader in their industry. The fund is managed by an experienced team as highly engaged and committed as the entrepreneurs they support. Fund investors are the state of Saxony, financially supported by the European Regional Development Fund (ERDF), three major local Saving Banks, and LBBW.

What we are looking for

- Highly motivated entrepreneurs from several technology sectors who intend to setup a business in Saxony.
- Sectors: ICT, Semiconductors, MEMS/MOEMS, Medical Engineering, Optics, Material Science, Life Science, Cleantech, New Media.
- Companies in seed and startup-stage who started operations less than five years before the possible closing of a first financing round with TGFS.
- Firms with a scalable business model and an exit potential within the next 3 to 6 years.

You are studying or already working as a scientist or engineer? Starting your own company sounds more attractive to you than a scientific career or getting stuck on the way up in a major enterprise?

We would like to analyse the potentials of your ideas together with you and support you towards **SUCCESS**.

What we offer

- Equity (minority stake only).
- Venture Capital up to 4m EUR per business, at a maximum of 1.5m EUR per year.
- Hands-on support of the companies.
- Support in strategic issues, business development and financing.
- Extensive experience and know how in creating value for investors and entrepreneurs.

We are interested in your business idea!
